

Florence — n8n Workflows

Workflow inventory for the Florence Amazon CRO assistant

Keplo × Product Pinion · Seller Sessions Workshop · 37 workflows total

11

P0 — WORKSHOP CRITICAL

22

P1 — LAUNCH (2 WEEKS)

4

P2 — ROADMAP

Naming: All workflows prefixed `florence-` per the no-orphan rule. **Priority:** **P0** ship for live demo · **P1** ship within 2 weeks · **P2** post-launch roadmap.

Skill 1 — Market Informant

4 workflows

- 1 **`florence-marketinformant-sqp-watcher`** **P1**
Daily 6am cron. Reads SQP data, compares to 7-day baseline, flags CVR/CTR shifts beyond $\pm 15\%$. Triggers investigation flow on signal.
- 2 **`florence-marketinformant-listing-snapshot`** **P1**
Weekly competitor scrape. Captures image hash, price, title, bullets, A+ presence. Diffs against prior snapshot.
- 3 **`florence-marketinformant-price-alert`** **P1**
Sub-flow. Fires Slack alert when competitor price moves beyond threshold.
- 4 **`florence-marketinformant-investigation`** **P1**
When SQP shifts, pulls latest competitor snapshots and writes a "what changed" report with recommended next step.

Skill 2 — Variation Engine

4 workflows

- 5 **`florence-variation-image-analysis`** **P1**
Vision model analyzes target image. Extracts angle, background, text overlays, whitespace, lifestyle vs studio, color palette.
- 6 **`florence-variation-technique-match`** **P1**
Cross-references image attributes against `curated-techniques.json`. Returns 3–5 unmissed techniques with rationale.
- 7 **`florence-variation-generate`** **P1**
Generates a mockup using top technique (with user's image gen API key) or outputs a paste-ready prompt.
- 8 **`florence-variation-monthly-reminder`** **P2**
Auto-triggers a fresh variation test on the 1st of each month.

Skill 3 — Shopper Interrogator

6 workflows · DEMO SKILL

- 9 **florence-shopper-review-mining** P0
Mines competitor 1-star and 3-star reviews. Extracts objection patterns with verbatim quotes and frequency.
- 10 **florence-shopper-rufus-extract** P0
Pulls questions Amazon's Rufus AI surfaces on the listing. Real shopper questions Amazon already identified as common.
- 11 **florence-shopper-pp-openended-launch** P0
Launches the "What would stop you from buying this?" Product Pinion poll. Collects unprompted shopper language.
- 12 **florence-shopper-objection-synthesis** P0
Claude consolidates reviews + Rufus + PP into 5–7 distinct objection clusters with evidence from each source.
- 13 **florence-shopper-pp-ranking-launch** P0
Second PP poll. Real shoppers rank the 5–7 objections by importance — most to least likely to stop a purchase.
- 14 **florence-shopper-image-blueprint** P0
Generates the slide-by-slide secondary image brief: objection → image concept → expected lift.

Skill 4 — Evergreen Image Tester

5 workflows

- 15 **florence-tester-image-pool-assembly** P1
Gathers seller's main image, all variations, and competitor mains into a single test pool.
- 16 **florence-tester-search-simulation** P1
Assembles a realistic search results page comparison image — your image surrounded by competitors as it would actually appear.
- 17 **florence-tester-pp-tournament-launch** P1
Fires PP comparison poll. Real shoppers click which product they'd buy and explain why.
- 18 **florence-tester-results-feedback** P1
Parses results, extracts win rate and qualitative themes, packages back into Variation Engine input for next round.
- 19 **florence-tester-quarterly-cadence** P2
Auto-triggers full image tournament every quarter or on Market Informant alert.

Cross-cutting Core

10 workflows

- 20 **florence-brief-daily** P0
The 8am Slack DM. Overnight signals → priority pick → ends with one line: "What I'd do today: [one action]."
- 21 **florence-brief-voice** P1
ElevenLabs TTS of the daily brief. Posted as a 60-second audio clip in Slack — listen with your coffee.
- 22 **florence-recap-weekly** P1
Friday 4pm. Tests in flight, results this week, what's queued for next week.
- 23 **florence-memory-write** P0
Persists every recommendation, test, result, and conversation to Florence's Supabase memory.

- 24 **florence-memory-load** P0
Loads relevant context (past tests, prior recs, ASIN goals) before any agent run. The "feels personal" lever.
- 25 **florence-prioritization-score** P0
Scores every recommendation on the Keplo formula: Data 40% + Impact 30% + Effort 15% + Speed 15%.
- 26 **florence-handoff-slack** P0
Posts Florence output to the right Slack channel/DM with formatting. The primary delivery surface.
- 27 **florence-handoff-notion-task** P1
Creates a Notion task in the user's test backlog with full context — objection, recommendation, expected lift.
- 28 **florence-handoff-designer-brief** P1
Turns the image blueprint into a designer-ready spec (or AI image-gen prompt).
- 29 **florence-handoff-calendar-block** P2
Auto-blocks 30 min on the user's calendar to ship the priority test.

Data Ingestion

4 workflows

- 30 **florence-data-spapi-sqp** P1
Daily SP-API search query performance pull. Granularity: ASIN × keyword × date.
- 31 **florence-data-spapi-business-reports** P1
Daily Business Reports pull — sessions, units, conversion by ASIN.
- 32 **florence-data-spapi-ppc** P1
Daily PPC performance pull — campaign metrics, ACoS, search term reports.
- 33 **florence-data-spapi-token-refresh** P1
Hourly cron. Keeps SP-API tokens alive across all data workflows.

Operations

3 workflows

- 34 **florence-onboarding-new-asin** P1
One-shot setup when a seller adds an ASIN. Configures competitor set, baseline pulls, schedule, target metrics.
- 35 **florence-onboarding-competitor-set** P1
Triggered when seller updates competitor list. Re-baselines tracked competitors.
- 36 **florence-monitor-error-handler** P1
Catches errors from any Florence workflow. Self-heals common cases (token refresh, rate limit retry). Pings ops on repeated failures.

Workshop Demo

1 workflow

- 37 **florence-demo-live-trigger** P0
Single button on stage. Audience picks an ASIN, Dorian types it in, this fires the full Skill 3 chain end-to-end.
